T.C. 2800

This listing of claims will replace all prior versions, and listings, of claims in the application:

## **LISTING OF CLAIMS:**

l. (currently amended) An apparatus for controlling the opening of a cover over a grilling surface, comprising:

a motor coupled to the cover, said motor operating to adjust an angle of the opening between the cover and the grilling surface.

- 2. (original) The apparatus of Claim 1, further comprising a counterweight attached at the rear of the cover.
- 3. (original) The apparatus of Claim 1, further comprising a remote control for transmitting control signals to said motor.
- 4. (currently amended) The apparatus of Claim -4-3, wherein said remote control transmits start and stop signals to said motor.
- 5. (original) The apparatus of Claim 4, wherein said motor operates only during the transmission of control signals to said motor.
- 6. (original) The apparatus of Claim 4, wherein said remote control transmits signals to control flow of a combustible fuel.
- 7. (original) The apparatus of Claim 1, wherein said apparatus is removable from the cover.
  - 8. (original) The apparatus of Claim 1, wherein said motor is battery powered.
- 9. (original) The apparatus of Claim 1, wherein said motor stops movement of the cover at a point within a full range of the cover movement.
- 10. (original) The apparatus of Claim 1, wherein said grilling surface is a charcoal briquette fueled barbecue grill.
- 11. (original) The apparatus of Claim 1, wherein said grilling surface is a combustible gas fueled barbecue grill.
  - 12. (currently amended) A cooking apparatus, comprising:
    - a grilling surface;
  - a cover that provides a hollow chamber having an adjustable opening over said grilling surface; and
  - a motor coupled to said cover, said motor operating to adjust the opening between said cover and said grilling surface.

- 13. (original) The cooking apparatus of Claim 12, further comprising a remote control that transmits a control signal to said motor.
- 14. (original) The cooking apparatus of Claim 13, wherein said remote control transmits start and stop signals to said motor.
- 15. (original) The cooking apparatus of Claim 13, wherein said motor operates only during the transmission of control signals to said motor.
- 16. (original) The cooking apparatus of Claim 13, wherein said remote control transmits signals to control flow of a combustible fuel.
- 17, (original) The cooking apparatus of Claim 12, further comprising a counterweight attached at the rear of the cover.
- 18. (currently amended) The cooking apparatus of Claim 12, wherein said motor is removable from the grilling surface detachable.
- (original) The cooking apparatus of Claim 12, wherein said motor is battery powered.
- 20. (original) The cooking apparatus of Claim 12, wherein said motor stops movement of the cover at a point within a full range of the cover movement.
  - 21. (original) A cooking apparatus, comprising:
    - a grilling surface:
    - a cover means for providing an adjustable opening over said grilling surface; and
  - a cover movement means for opening and closing said cover over said grilling surface.
- 22. (original) The cooking apparatus of Claim 21, further comprising a remote control means for transmitting a control signal to said cover movement means.
- 23. (original) A method of controlling the opening of a cover over a grilling surface, comprising:

causing a motor to operate upon receiving a first signal; said motor coupled to the cover such that operation of said motor causes an adjustment in the placement of the cover over the grilling surface;

causing said motor to stop operating upon receiving a second signal.

24. (original) The method of Claim 23, wherein activating a first control generates said first signal.

- 25. (original) The method of Claim 24, wherein releasing said first control generates said second signal.
- 26. (original) The method of Claim 24, wherein activating a second control generates said second signal.
- 27. (original) An apparatus for attaching a motor to a cover of a grilling surface, comprising:

a motor support beam having an adjustable length, said motor support beam comprising a motor attachment surface for attachment to the motor and at least one base attachment surface for attachment to a support base of the grilling surface.

- 28. (original) The apparatus of Claim 27, further comprising a counterweight having an cover attachment surface for attachment of said counterweight to the cover of the grilling surface.
- 29. (original) The apparatus of Claim 28, further comprising a coupling rod for attaching the motor to said counterweight
- 30. (original) The apparatus of Claim 27, further comprising a coupling rod for coupling the motor to the cover of the grilling surface.
- 31. (original) The apparatus of Claim 27, wherein said motor support beam comprises a first portion insertable into a second portion.
- 32. (original) The apparatus of Claim 31, wherein said first portion has a threaded exterior portion, and said second portion has a threaded interior portion, the length of said motor beam being determined by turning said first portion with respect to said second position.
- 33. (original) The apparatus of Claim 31, wherein said motor support beam further comprises a spring member that presses said first portion away from said second portion.
- 34. (original) The apparatus of Claim 31, wherein at least one of said first portion and said second portion has a plurality of holes, the length of said motor beam being determined by inserting a pin through one of said plurality of holes.
- 35. (original) The apparatus of Claim 31, wherein the motor suspends from said motor support beam.
